

Nihad Zatric

Full-Stack Developer – Laravel / Vue.js / Nuxt

I design and build web applications that solve real business problems. With strong experience in Laravel, Vue.js/Nuxt and ERP development and integration, I can work on the full lifecycle of a project, from requirements gathering and technical design to development, deployment and maintenance.

Work experience

Front-end Developer – SaaS Redesign & Nuxt Migration — **Edko** Paris (full remote)

From Oct. 2025 to Jun. 2026

Worked on the complete front-end redesign of Edko, a platform used to automate evaluation processes including questionnaires, reminders, analysis and reporting.

- Implemented a new Figma-based design system across the application
- Contributed to the migration from Next.js to Nuxt 4
- Built reusable Vue components and improved code maintainability
- Developed analytics dashboards and data visualisations with Chart.js
- Suggested UX and technical improvements to improve usability and consistency

Tech stack : Nuxt 4, Vue 3, TypeScript, Shadcn, Tailwind CSS, Chart.js, Django 4, PostgreSQL, REST API, GitHub

Key skills : Front-end development, UI redesign, UX improvements, reusable component architecture, code optimisation, autonomy

Full-Stack Developer – ERP & Internal Business Applications — **France Solar** Brumath

From Dec. 2023 to Aug. 2025

Worked on the development and evolution of an internal ERP system used daily by around 300 employees in the photovoltaic industry.

- Developed business features for invoicing, planning, dispute management and site tracking
- Integrated external services including vehicle geolocation and real-time intervention tracking
- Built and maintained user interfaces with Vue and Vuetify
- Developed two Nuxt 3 apps for purchase requests and time tracking
- Participated in requirements gathering, technical decisions and mentoring an apprentice developer

Tech stack : Laravel 10, PHP 8.1, Vue 2 & 3, Nuxt 3, Vuetify, REST API, GitHub

Key skills : Full-stack development, business analysis, functional design, project coordination, mentoring, autonomy

Work experience

Backend Developer – REST API & Legacy System Integration (IBM i / AS400) — **Groupe Sermes - Willy Leissner** Strasbourg

From Sept. 2022 to Sept. 2023

Worked on the design, development and documentation of a REST API used to connect an IBMi (AS400) system to new e-commerce websites during a logistics platform migration project.

- Developed and documented REST APIs exposing business data such as products, stock and orders
- Migrated legacy AS400 web services to Symfony or integrated with existing RPG services
- Built XML import/export scripts for data exchange between systems
- Connected and queried DB2 databases through PDO ODBC

Tech stack : Symfony 6, PHP 8, REST API, OpenAPI (Swagger), DB2, IBM i (AS400), XML

Key skills : API design, API documentation, legacy system migration, ERP integration, data processing, backend development

Web Developer – ERP Integration & Industrial Business Tools — **Cedam** Obernai

From July 2020 to Jun. 2022

Built custom web applications around the Divalto ERP system to support daily operations in a bathroom furniture manufacturing company (~40 employees).

- Developed business tools for sales, stock management, after-sales and project tracking (including Gantt planning)
- Created a WYSIWYG editor for promotional offers and marketing brochures
- Built production tools including barcode scanning for parts lists and order/production launch workflows

Tech stack : PHP 5.6, MySQL, JavaScript, VBA, WAMP, Divalto ERP

Key skills : Business application development, ERP integration, production workflow automation, understanding of manufacturing processes, autonomy

Education

CDA : Application Designer & Developer (Level 6 equivalent) — **CCI** Strasbourg

From Sept. 2022 to Jun. 2023

BTS SIO : IT & Software Development (HND equivalent) — **Iris** Strasbourg

From Sept. 2020 to Jun. 2022
